JOB DESCRIPTION:

We are seeking for a problem-solving and self-motivated professional individual to work as Data Analyst. Our ideal candidate must have exceptional analytical and communication skills.

ROLE AND RESPONSIBILITIES:

- Finds novel new data sources to enrich their analysis.
- Performs root cause analysis by applying mathematical and statistical methods to business and risk management problems in order to make recommendations to key stakeholders.
- Mines, process, and summarize data with engaging presentations and visualizations.
- Manages the quality assurance of data scraping, query databases for stakeholder requests.
- Triage data issues for timely resolutions.
- Analyzes large datasets, draws valid inferences and prepares reporting insights in narrative or visual form.
- Sets up and maintains data processes and new analytics capabilities.
- Produces and tracks key performance indicators.
- Formulates functional and technical requirements from business problems.
- Understands strategic objectives in order to create plans to achieve a desired outcome.

QUALIFICATIONS:

- Bachelor's degree in Mathematics, Statistics, Economics, Finance, or Computer Science
- Coding skills in a language such as SQL, Python and/or R
- Working knowledge of data gathering, cleaning, and transforming techniques
- Impeccable analytical and problem-solving skills, including predictive modeling
- Ability to work in high-pressure, fast-moving environment
- Turns data in actionable insights
- Ability to set and meet deadlines
- Experience with statistical software
- Technical writing skills
- Excellent attention to detail
- Strong written/verbal communication skills

OTHER QUALIFICATIONS:

- Legally authorized to work in the U.S. without any restrictions
- Okay to work 100% on-site in Ridgefield Park, NJ
