Compensation

\$120K – \$135K • Offers Equity

The actual salary is dependent upon many factors, such as education, experience, and skills. The pay range is subject to the discretion of the Company. Additionally, Veho offers a competitive equity package, comprehensive medical, dental, and vision coverage as well as other benefits such as 401k and unlimited PTO for exempt-level roles.

OverviewApplication

About Veho

Veho is the post-purchase experience company that unlocks the potential of everyday consumers and brands to fully participate in e-commerce. Building an entirely new end-to-end logistics infrastructure, powered by the latest technology and designed for the modern era of shopping, Veho is reinventing shipping, and all parts of the post-purchase experience as we know it. By removing the pain from delivery and returns, Veho is creating powerful opportunities for brands to engage and build deep loyalty with their customers like never before.

About The Role:

As a Product Data Scientist, you'll be directly embedded in a team of data scientists, engineers, and machine learning engineers to help scope, quantify, and investigate modeling-based solutions with our logistics network and user experiences. You'll partner with product managers

to understand high-value business problems, build insights that inform daily operations, and work with cutting-edge technology. You'll create self-serve products (modeled data pipelines, advanced dashboards, predictive and descriptive models) that help all teams involved in Routing (Data Science, Operations, Product, Engineering) understand the performance of models and the opportunities to improve it.

Responsibilities Include:

- Understanding business context and gathering requirements
- Build reliable, efficient, products to monitor our AI/ML capabilities
- Educate stakeholders and leadership on model impacts, changes and analytical insights
- Create robust data pipelines to feed analyses
- Ensure data quality and data integrity through best practices in data integration
- Analyze and evaluate the impact and effectiveness of model changes in production systems via experiments

What You Bring:

- Bachelor's Degree plus 2 years of experience in data science or data engineering, or Master's Degree plus 1 years in data science
- Experience using statistical modeling or machine learning techniques to solve business problems
- Strong SQL, Python and dashboarding skills
- Experience with open source languages and tooling used for large-scale data analytics like Python, numpy, and/or distributed data processing systems like spark
- Experience with analytical relational databases like Redshift, BigQuery, or Snowflake
- Experience with vehicle routing problems or logistics is nice to have but not required

#LI-Remote

Veho is a growth company that looks for team members to grow with it. Veho offers a generous ownership package, casual work environment, a diverse and inclusive culture, and an electric atmosphere for professional development. No matter the location, or the role, every Veho employee shares one galvanizing mission: to revolutionize the world of package delivery by creating exceptional experiences for customers and drivers. We are deeply value-driven (Team Up, Drive Impact, Take Ownership, Solve Bigger, Obsess Over Experience, Make Today Count) and care tremendously about investing in people. We are committed to creating a diverse team and

an environment that provides everyone with the opportunity to do the work of their lifetime. Veho is unable to provide sponsorship at this time.

Veho is committed to nurturing, cultivating and preserving a diverse and inclusive work environment. Empathy and respect for each other is core to our values and a central part of working here every day. The diversity of our employees, drivers and applicants is welcomed and encouraged.

By providing your phone number you consent to possibly be texted in relation to the job you are currently applying. You are free to opt-out at any time if texting communication occurs from Veho.
