Compensation

Zone A

Estimated base salary \$150K – \$180K

OverviewApplication

At MultiOn, we are looking for a few more A+ players who want to join a rocket ship startup.

About Us:

We believe in the power of Artificial Intelligence to revolutionize the way we interact with computers and the digital world. We're not just building a state-of-the-art personal AI Agent that brings the concept of JARVIS from science fiction into reality; we're also reshaping the future of software. Our mission is to pioneer Software 3.0, where software doesn't just respond to user commands, but also acts on your behalf.

We hold the record for the first AI flight booking, food order & workplace certification and believe this to be just the beginning. We're a team of passionate innovators, technologists, and dreamers, and we are looking for extraordinarily folks to join us on this exciting journey.

We're funded by leading investors at General Catalyst, Amazon, Samsung along with Reid Hoffmann, Jeff Dean, and select angels from OpenAI and Google DeepMind. We're fortunate to

have the support of many amazing advisors, including the world's foremost experts in AI.

About the role:

We're on a quest for a visionary engineer—a true problem-solver with a mastery of Backend, Front End, and Full Stack development—to join our team and help us craft the future. Our ability to swiftly iterate on products, informed by market feedback, is crucial as we aim to bring our technology to millions worldwide, ensuring safe and reliable delivery. Your role will be pivotal in maintaining the momentum and excellence of our innovations, shaping solutions that meet the needs of users everywhere.

In this role, you'll be expected to embrace complexity, think differently, and use your expertise to turn bold ideas into tangible realities. Picture yourself as working on the a futuristic AI assistant like JARVIS from science fiction, transforming ambitious concepts into groundbreaking products.

Your impact will go beyond technology; you'll harness the power of AI to enhance the efficiency and intuitiveness of our products. You'll be part of a vibrant team, committed to collaboration and the integration of diverse perspectives to drive innovation and create exceptional solutions.

Responsibilities:

- Develop and integrate state-of-the-art AI and agent technologies, focusing on advances in long-term memory, reliability, planning, reasoning, actions, and embodied AI into our products.
- Work closely with product, engineering, and research teams to translate AI research into practical, impactful solutions that align with business goals.
- Apply rigorous testing and refinement techniques to continuously enhance the accuracy and effectiveness of AI Agent technology.
- Rapidly prototype and test new ideas, ensuring our AI solutions lead the industry and adapt to evolving market needs.

Qualifications:

- At least 3 years of product engineering experience, with proven proficiency in building and scaling robust systems, preferably using technologies like Python, JavaScript, React, or other backend languages.

- Demonstrated ability to take ownership of product features from conception to deployment, ensuring scalability and meeting growing demands.
- Experience with large Transformer models such as GPT or LLaMA, with solid skills in prompt-engineering, working with LLM APIs and fine-tuning.
- Deep understanding of user-centric design and development, with a commitment to creating exceptional user experiences.
- Dedication to iterative development and continuous improvement, using user feedback and market insights to refine products.
- Strong collaboration skills, with a proven ability to work effectively across teams, including product managers, designers, and engineers, to deliver outstanding products.
- Experience in fast-paced startup environments, showing a capacity to adapt and thrive under pressure.
- Excellent communication skills, capable of clearly and effectively conveying technical details and project status to ensure alignment and transparency.

Why Join Us:

- Be part of a fast-paced, ambitious startup that is pushing the boundaries of AI technology and reshaping the future of software.
- Work on groundbreaking technology with real-world impact.
- Collaborate with a diverse, talented team of AI experts, engineers, and designers.
- Opportunity to grow and advance your career in the burgeoning field of AI and software engineering.
- Competitive salary, benefits, and equity options.

How to Apply:

Share your story, your passion, something you've built, and why you'd be the perfect fit for our team. Send us a resume and a brief description of your favourite project and why to hire@multion.ai

MultiOn Inc. is an equal-opportunity employer. We celebrate diversity and are committed to creating an inclusive environment for all employees.

Note: Due to the high volume of applications we receive, we can only respond to applicants who have been selected for an interview.
