

Data Scientist Opportunity - NY

New York, NY

Full-time

Job Description

As a Data Scientist you will be collaborating across the organization, focusing on the data collection from land-based, web-based, social media, and mobile platforms, as well as the CRM practice.

Working on a wide variety of initiatives, you will analyze massive amounts of data captured daily, and will build reporting solutions and develop visualizations to enable decision-making.

The Data Scientist will be responsible for a wide variety of technology-driven, data-centric practices, including:

Implementation and maintenance of analytics algorithms in a production setting.

Development and implementation of analytics reporting and visualization dashboards.

Development and support of database applications.

Qualifications

Requirements:

Distinguished academic record, Bachelor's degree,

Strong mathematical background. Knowledge of statistics.

2-5 years of actual Data Scientist experience.

SQL experience: should have exposure to one of MySQL, Oracle, Hive, Shark, Presto.

Programming: well versed in one of the following programming languages: Python, R, Ruby, Java, C++.

Data Visualization on the web. Frontend, Visualization, JavaScript, D3, Dygraphs, Google Charts.

Also Helpful (NOT Required):

Experience with NoSQL (such as MongoDB, Hadoop)

Additional Information

All your information will be kept confidential according to EEO guidelines.
