**EquipmentShare is Hiring a Data Analyst**

EquipmentShare is searching for a Data Analyst for our corporate office in Columbia, MO, to support our Fleet Operations team as the department continues to grow.  **This new team member may be based anywhere in the United States and offers a remote/hybrid work option, but must be able to meet with management in person at least quarterly.**

...professionals who all share an interest in providing a ...experience. Above all, we care about building ...is by assembling a skilled, passionate and talented ...iciency throughout the entire construction industry, ...l possible.

member of our team, you will play a crucial role in shaping strategic decisions through advanced modeling and analysis.

You will play a crucial role in extracting actionable insights from our data to drive informed decision-making. This role is particularly focused on operations research themes within supply chain, modeling, and conducting comprehensive analyses to optimize our processes and enhance overall efficiency.

## Primary Responsibilities

- Apply operations research methodologies to identify opportunities for process improvement and optimization, as well as enhance operational efficiency.
- Utilize statistical techniques to analyze large datasets and extract meaningful insights.
- Develop and implement modeling to support business decision making based on stakeholder-driven requirements.
- Identify key performance indicators (KPIs) and develop reports and dashboards to monitor and communicate business performance.
- Tackle complex business challenges using data driven approaches, and be prepared to defend your opinion on recommendations.

## Skills & Qualifications

- Intermediate SQL & Python/R Required
- Proven experience (2+ years) in a data analyst role, with a focus on operations research and modeling.
- Experience in applied statistics and communicating results to a lay audience
- Demonstrable track record of dealing well with ambiguity, prioritizing needs, and delivering results
- Strong problem solving skills
- Must be eligible to work in the United States without sponsorship

## Preferred Qualifications:

- Experience with machine learning algorithms
- Knowledge of Supply Chain principles
