Data Analyst

theta. (/)

📍 Baltimore, MD - 📶 Remote (Within Location)   🏢 Full-Time   🏢 Development
🏛 $125k - $136.50k

About theta.

theta. is a. SBA-Certified **8(a) & HUBZone** digital integration and management firm based in Baltimore, MD, working to create a world where tech works for everybody. Our mission is to bridge the gap between the intersection of innovation & technology and practical applications that serve the public interest.

We specialize in creating software that enhances efficiency, security, and accessibility in government operations. Our commitment to **be of service**, **be passionate**, and **be different** drives us to deliver projects that make a significant impact.

Position Overview:

We are seeking a highly motivated and experienced Data Analyst to join our team and play a central role in expanding ReportStream's capabilities. Your efforts will focus on incorporating additional reportable conditions into the platform, ensuring it becomes more comprehensive, configurable, and efficient. You will collaborate directly with healthcare providers, public health agencies, and our engineering teams to refine data processes and enhance platform functionality.
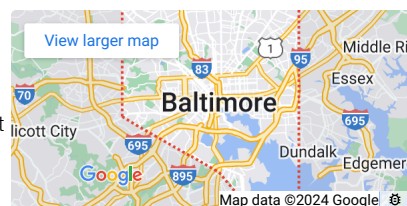

Key Responsibilities:

- Work closely with healthcare organizations to understand and map their data reporting workflows.

- Develop detailed workflow blueprints, create test scenarios, and compile user stories to guide system enhancements.

- Outline and define the expected data inputs/outputs and manage the necessary data transformations for seamless
