EDG

Data Scientist - Leading Quant Hedge Fund

New York, NY

Hedge Fund Talent / Full-Time /

Are you a Data Scientist that is interested in working with one of world's leading Quantitative Hedge Funds? Are you a Data Scientist that would enjoy working with a cutting-edge financial and engineering teams and to expand their data science and machine learning capabilities?

This **New York City based leading Quantitative Hedge Fund** seeks a talented Data Scientist that will work closely with the finance, operations, as well as other investment teams across the firm.

As the Data Scientist, you will:

• Manage large amounts of complex data in R or Python and running quantitative queries.

• Identify timely and unique data sets, diving deep into a diverse set of data domains as well as visualizing and exploring underlying data drivers

• Build statistical analysis and financial modeling techniques to large data sets.

What you need:

- Master's or PhD degree from a competitive university in a quantitative field such as statistics, mathematics, operational research, computer science, finance or economics.

- Quantitative and Developer experience (Python and/or object oriented programming)

- Prior experience working or Internship at a Financial firm or leading technology (Google, Facebook, Amazon, etc...) firm is helpful

- Proficiency with statistical and data analysis and programming tools such as R, SAS, Stata, SQL or Matlab.

What you get:

• Work with one of the leading Quantitative Hedge Funds

• Work in not your typical hedge fund. Very collaborative and casual work environment as compared to most Wall St. Firms

• Incredible work perks (too many to name!)
